

2019 Regional Intellectual Property Champions

The U.S. Chamber of Commerce's Global Innovation Policy Center is launching an initiative to cultivate the next generation of strong IP leaders. On the sidelines of the International IP Index rollouts, the GIPC will honor recipients with a Regional IP Champions award to recognize their role in advancing IP protections in a given market.

We would like to invite you to put forth nominees for this new initiative. Potential candidates for this award include individual IP rights holders or advocates for intellectual property protection.

We look forward to discussing this program in more detail with you in hopes that we can find a suitable candidate to receive the award. For questions, please contact Kelly Anderson at kanderson@uschamber.com.
