# THE WAITING HAS ENDED

On 27th October 2020, Boston Scientific accepted the proposal to fund the new sarongs, towels, and dictionaries to the residents at the Orang Asli Settlements at Desa Ria, Gerik, Perak. In conjunction with the company's Season of Giving, a collection of clothes, toys, stationery, and even reading materials is raised. Despite the pandemic, the employees at Boston Scientific shown their generosity and kindness by donating the items for the need of the Orang Asli. All the items have been delivered to the settlements on 25th December 2020 in celebration of Christmas at the settlements.
